

Industrial Capacity Portfolio

2025

ECONOMÍA
Secretaría de Economía e Innovación

OBJECTIVE

Identify, promote and strengthen the capacity of local suppliers to satisfy the needs and requirements of the industry, established companies, and new investment projects by implementing the following strategies:

State level database register.

Promotion of the industrial capacities at a local, regional and international level.

Linkage with potential buyers, consumers or distributors and economic development organizations.

FDI attraction aiming to support integration projects, supply chain strengthening and innovation centers all over the State.

ALLIES

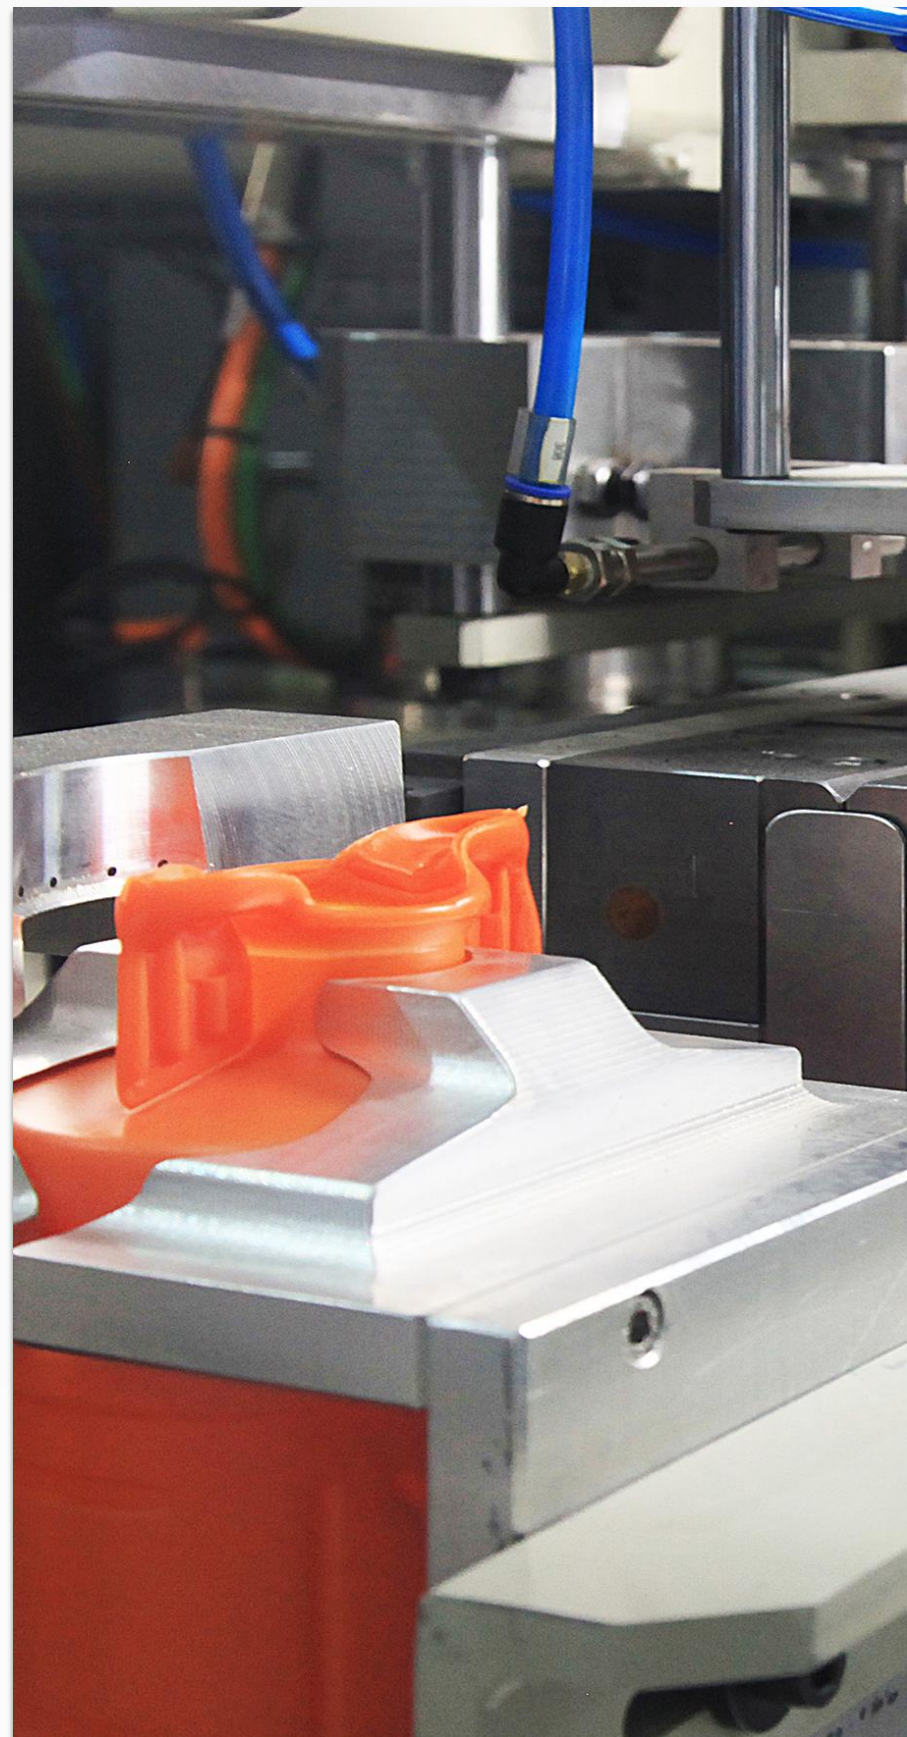

KEY SECTORS

TRADE &
INVESTMENT

ECONOMÍA
Secretaría de Economía e Innovación

1

Register

Self-register at Platform.

www.probajasupplychain.com

2

Validate information and schedule a company profiling visit

The information from your registration will be confirmed and an interview for profiling purposes will be scheduled through a visit to your facilities

3

Capacities Profiling

A profile of your capacities will be developed, both technical and promotional. Additionally, future sectors to address and inhibitors will be identified.

4

Promoting your company

A platform will be promoted with established companies and new investments. Likewise, a sector-specific promotion strategy will be established (promotion agendas, participation in events focused on your capacities, among others).

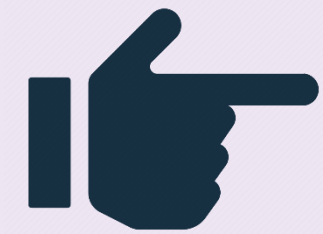

The Platform
